DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1- 12, drawn to a peptide vaccine composition, classified in class 424, subclass 204.1.

IF Applicant elects Group I, then they must also elect one inventive sequence from SEQ ID#s 1- 22.

- II. Claims 13- 21, drawn to a DNA vaccine, classified in class 514, subclass 44.

IF Applicant elects Group II, then they must also elect one inventive DNA sequence that encodes SEQ ID#s 1- 22.

- III. Claim 22- 23, drawn to an antibody, classified in class 530, subclass 387.1.

- IV. Claims 24- 25, drawn to a diagnostic method for patients who do not progress, classified in class 435, subclass 5.

Therefore, if group I or II is chosen, election is required of one of inventions I-II and one of inventive sequences SEQ ID #1- 22 or DNA encoding SEQ ID #1- 22.

The inventions are distinct, each from the other because of the following reasons:

Inventions SEQ ID #1- 22 or DNA encoding SEQ ID #1- 22 are unrelated.

Inventions are unrelated if it can be shown that they are not disclosed as capable of use

Application/Control Number: 09/827,345
Art Unit: 1648

together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, represent structurally different polypeptides and polynucleotides. Therefore, where structural identity is required, such as for hybridization or expression or methods of treatment, the different sequences have different effects.

Inventions I- III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to distinct chemical structures that have different functions.

Inventions I- III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions (I- III) are not required to practice IV.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and they have search requirements that are not coextensive, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
